

YOU CAN PREVENT CANCER

Parents and health care professionals *are the key* to protecting adolescents from HPV cancers.

HPV CAUSES CANCER

in 27,000
Americans yearly —
that's 1 person
every 20 minutes.

HPV VACCINE IS RECOMMENDED

at the same
time as other
teen vaccines.

HPV VACCINE IS MOST EFFECTIVE

in preteens,
but can be given at
9-26 years of age.
