State of Iowa

(2014):	18.5%
(2015):	18.1%

Youth any tobacco use prevalence

Iowa Youth Survey, 2014

Adams:	32.1%
Fremont:	7.1%
Montgomery:	22.9%
Page:	22.5%
Ringgold:	9.1%
Taylor:	14.6%

State of Iowa: 18.1%

The adult (age 18 and older) estimated current cigarette use prevalence rates were calculated by *County Health Rankings* and published online in 2016 using data from the 2014 Iowa Behavioral Risk Factor Surveillance System. Youth rates are self-reported tobacco use rates in 11th grade students. Youth 'any tobacco use' includes cigarette, cigar, smokeless tobacco and e-cigarette use. The adult and youth 2014 prevalence rate estimates were the latest county-level rates available at the time this snapshot was created.
