The mission of the Cooley's Anemia Foundation (CAF)

is to increase life expectancy and enhance the quality of life for those impacted by thalassemia, a class of genetic blood disorders, most of which require regular blood transfusions and aggressive management of chronic iron overload, the predominant cause of early death. We do so by funding medical research to advance treatment and curative approaches, by supporting and advising patients and their families and advocating on their behalf and by educating medical professionals and the general public.

Every day, we strive for longer and healthier lives for all patients with thalassemia until a universal cure is found.

How can CAF help you?

- By providing you with up-to-date information about thalassemia care.
- By helping you handle difficult insurance issues.
- By addressing your questions and concerns.
- By introducing you to other individuals and families in the thalassemia community.
- By keeping you informed about new clinical trials.
- By providing free access to our on-staff Social Worker and a Case Manager to help you maintain your wellness.

We are your partner in living with thalassemia!
